

	Description	Evaluation	Likelihood	Impact Level	Responsibility
1	Broken version depolyed	Missing requirements laid out at start of project	Medium	High	Developers
2	Not meeting deadline for project	Complete application not submitted on due date	Low	High	Developers
3	Not obtaining correct software for project	Not having correct software installed and configured	Medium	High	Developers
4	Developer becomes sick	Developer not able to complete project due to unplanned illness	Low	High	Developers
5	Reaching trainer for help not availble	Unable to reach support from trainer whilst stuck on project	Low	Medium	Developers/Support staff
6	Developing wrong functions	Wrong functions made instead of whats required on MVP	Low	Low	Developers
7	Images become corrupted	Images on readMe and appllication become corrupted	Medium	Low	Developers
8	Website is hacked	Website created by developer is hacked	Medium	High	Developers
9	Problems with connectivity between software	Connection between software to build application not working	Medium	High	Developers
10	Not able to present application on presentation day	Developer is sick or unable to attend for various reasons	Low	High	Developers

Response	Control Measures
Have most stable version released	Ensure work is on dev/feature branches
Ensure all work that is completed is submitted	Ensure all work compiles and submitted before due date
Install and configure the software as soon as possible	Ensure software is correct and set up prior to commencing project
Complete work at later date	Ensure staying healthy throughout project
Find help through peers	Ask questions when you have exhausted all other avenues
Ensure work on correct functions started as soon as possible	Ensure developer plans work correctly
Ensure images have multiple ways of being displayed	Ensure images are being checked at any point
Ensure website is backed up	Ensure tests are completed
Try and solve connection issues as soon as possible	Ensure all software connects and works before starting
Ensure everything is prepared fully and assessor is made aware of any problems	Ensure all work is submitted and if developer is unable to present a follow up day is confirmed
